60730-2-5-2014

ANSI Z21.20-2014

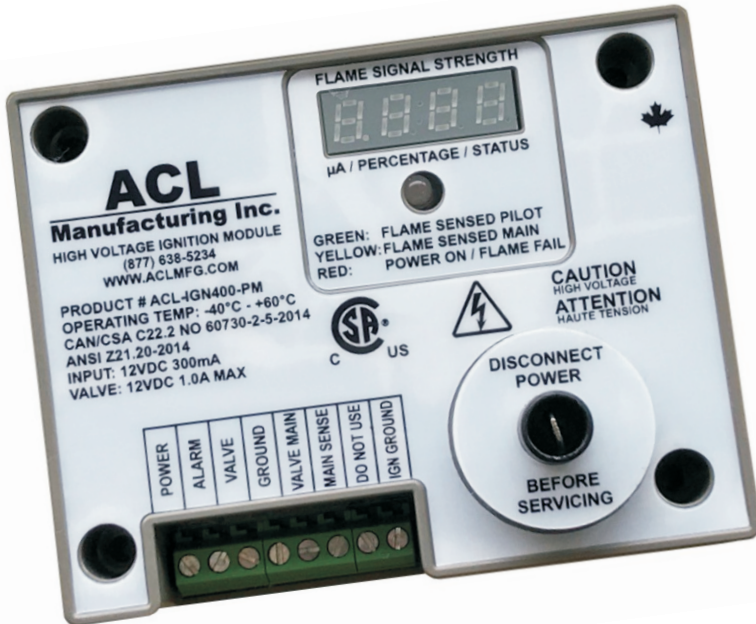

Flame signal strength
displayed

Main flame sensing

LED indication of pilot, main
and flame fail

Flame-out response time of
0.8 seconds

Power supply 12 VDC

ACL IGN400-PM Ignition Module

The **ACL IGN400-PM Ignition Module** is designed to light and monitor a pilot, reacting fast to a flame out and re-lighting the pilot. It uses a single flame rod for both Ignition and Flame sensing, displaying the Flame signal strength on the display and with LED indication. The Ignition Module can monitor a main flame using a second Ignitor Rod.
